---

## CERTIFICATION STATEMENT

This certificate holds no expiration date and remains valid as long as any of the following services are operational:

- <https://dennis.systems>
- <https://flaw.space>

Additionally, this certification covers all subdomains and products associated with the mentioned services, and usage is unlimited for the certified individual.

Additionally, this certification covers server-side installation for all the projects and their updates.

Ilona Ryvkin is authorized to utilize these products for both personal and work-related purposes.

It is important to note that the validity of this certification persists even in the event of any changes or charges applied to the system.

This means that alterations in pricing do not impact the certified person's entitlement to the specified services.

Read <https://docs.dennis.systems> for more documentation
